

Lifeline Ultra-2 Warranty

To obtain the Limited Warranty:

Review [warranty and form](#), fill out, and send in accordingly.

For the 3 Year Warranty: Apply two coats of Lifeline Ultra-2 on bare wood (decks, railings, and any other horizontal wood is excluded) followed by one coat of [Lifeline Advance Topcoat](#) according to directions printed on the pail. [Log Wash](#) must be used as the cleaning agent before application (**bleach and water or any other non Perma-Chink cleaning agent must not be used**) if the logs have grayed from weathering use [Wood ReNew](#) instead of Log Wash. If applying to media blasted logs, apply one coat of [Prelude Clear Wood Primer](#) before applying Ultra-2. If you choose to apply a borate treatment to the wood, it must be a Perma-Chink product like [Shell Guard RTU](#).

For the 5 Year Warranty: The 3-Year warranty can be extended two additional years (5 years total) by cleaning the logs with a Perma-Chink cleaner like [Log Wash](#) and applying one additional coat of [Lifeline Advance topcoat](#) on the third year. Applying more than one coat at a time of either product will void this warranty. The warranty for Ultra-2 begins on the date it was sold.
