Inside Log Help For Those Into Log Buildings

NEW

SASHCO TIMBERBRIGHT

BEFORE

AFTER

TimberBright log and wood cleaner removes stubborn surface dirt quickly and efficiently. TimberBright cleans any wood species to remove mold, mildew, and algae growths and dissolves common surface contaminants like dust, pollen, bird poo, and more to leave behind a fresh surface.

TimberBright's proprietary bio-enzyme action slightly dissolve, then lift off surface contaminants without etching or compromising the wood or other surfaces underneath. Also, it won't discolor high-tannin species like Cedar or Redwood and is gentle on local plant species when properly mixed. It also works great on other building materials like metal, stone, and concrete without damaging the surface. When used at lower concentrations, there's no need to rinse on the interior. Will not bleach wood. For wood bleaching, use Sashco's CPR Log Cleaner & Brightener instead. [Made in the USA.](#)

Apply at a rate of 300-400 sq. ft. per gallon of mixed cleaner. Mix anywhere from a 1:10 cleaner to water ratio for less aggressive cleaning all the way up to 1:2 cleaner to water ratio for more aggressive cleaning. 1 gallon of concentrate will make anywhere from 2 gallons to 10 gallons, depending on desired strength.

SALE! EYE ON CAULKING

Delivers performance that's hard to see. Conceal's colors blend in with the most popular stains used on log homes, and Conceal's light texture simulates the natural roughness of wood. The combination of color and texture makes it hard to see where the caulking ends and the logs begin. Although the caulking is hard to see, Conceal delivers performance. It has superior elongation, memory, and adhesion. Is resistant to rainfall in 1-4 hours and excellent for filling and concealing checks. Conceal has a limited lifetime warranty. **Application Temp:** 50-90° F. **Cleanup:** Soap & water. **Shelf Life:** 3 years. Made in the USA.

MANUS-BOND 75-AM CAULKING

A polyurethane caulking that has excellent adhesion to wood, especially on wood treated with paraffinic oil stains such as ProLux/Sikkens. Manus-Bond is paintable, sandable, and cures fast, even in low temperatures. Extremely low odor.

Excellent for using in tight, enclosed spaces and more pest resistant than latex caulks. If it rains shortly after application, it will not wash down the sides of your walls like acrylic based caulking. Instead, the rain will actually help it to set up. **Application Temp:** Surface must be above 40° F and frost free. **Note:**

If applying after staining, remember to cover Manus-Bond with stain after caulking has cured; this will provide UV protection and extend its longevity. **Cleanup:** Mineral spirits. **Shelf Life:** 1 year. Made in the USA.
