

# LumberJack Tenon Cutters

Achieve old world craftsmanship with today's most advanced tenon cutting technology! Whether you make log furniture as a hobby or a profession, chances are you value tools that help achieve precise results while saving time and money. LumberJack Tools dual blade tenon cutters are a breakthrough in cutter technology resulting in the highest level of performance and value.

Both the Industrial and Pro styles feature a self-centering design which produces perfectly shaped tenons. Dual blades cut twice as fast as ordinary tenon cutters and generate less heat for long lasting service. Body is CNC machined from solid 6061 aircraft aluminum for maximum strength with minimum weight. Blades are made of hardened steel and the 1/2" steel shank is threaded for easy replacement. Patent pending "IN-SIGHT" measurement system of slots and radial grooves at 1/2" intervals lets you see and measure tenon length during cutting. Made in the USA.

**Industrial-Series**

**Pro-Series**

**Sharpening Kits & Replacement Blades sold separately**

**Quick Stop System** Fits into IN-SIGHT System to stop tenon at desired length. Set contains 3 different lengths to fit 1", 1-1/2", and 2" LumberJack Tenon Cutters. Tenon cutter sold separately.
